Experience

Personal Projects

Bookchor Website Remake
- redesign and front-end development of the Bookchor website with a team of 4.
- created animations and page transitions using GSAP for enhancing user experience.
- Implemented responsive design principles to ensure optimal viewing experience across devices.

Chat Application
- Architected a chat application using React for the front end and Firebase for backend authentication and message storage.
- Integrated user authentication (login/logout functionality) and real-time message storage/display.
- Implemented Firebase Fire store for efficient data storage and retrieval.
- Ensured cross-browser compatibility and responsiveness to enhance user experience.

Todo List
- Created a functional and responsive todo list application using React.
- Deployed CRUD operations with useContext for state management, enabling seamless task creation, deletion, updating, and completion checking for users.
- Leveraged local storage to persist data and ensured mobile responsiveness.
- Enhanced user interface with Tailwind CSS for a modern and clean look
